

Occult Studies

By
Taras Handziy

Ukraine – Autumn 2004

About the Author

I was born on March 9, 1971 in Ternopil, Ukraine, the state on which territory Helena Blavatsky was born. I work as a senior lecturer at Ternopil University of National Economy.

When I was 30, after some sudden but wonderful events, I began understanding Theosophy. In autumn 2004 I visited Denmark where I got acquainted with 3 wonderful people that influenced me a lot: Soren Hauge from Theosophical Association Aarhus, Birgit Lomborg, the author of the 'Disciple's Mirror' and Bjorn Lomborg, who is considered to be one of the world's 100 most influential people.

Here I present my research in the sphere of Occult Studies. Its main theme is the revelation of the mystery of the Antahkarana construction. I'll be delighted to discuss this topic with everybody who is interested in it. I am sure it is worth for the further investigation. My email is handziy@yahoo.com

Will, love, wisdom,

Taras Handziy

Short note by Søren Hauge Chairman for Theosophical Association Aarhus

On 8. october 2004 I was contacted by Taras Handziy by mail because he was in Denmark in connection with his work. He had found our website www.teosofi.org on the Internet and already knew several things about our work, because he had been reading English sections from this and other

Articles

websites. It was soon followed up by meetings in our center and I had the pleasure to share thoughts with him about Theosophy and to connect with him in a very warm and friendly way. Taras had not yet connected psyically with people in esoteric circles, so it was a priviledge to be together and to share ideas and perspectives. Here follows some initial studies made by Taras.

Introduction

A lot of dictionaries of English give the definition of the word 'Occultism'. 'Occultism – a belief in or studies of supernatural powers.' Where does the border between nature and supernature lie? Perhaps, some people want to make the artificial borders between people, dividing all human beings and phenomena that they don't understand into two or more, often hostile, groups.

Different definitions of the word 'occultist' were given by people: from extremely negative to positive. At the beginning of the New Millenium the renewable definition should be given. Occultists are people who don't believe in any dogmas. They usually live according to the synthesis of the ideas:

1. They believe in God
2. They consider the synthesis of will, love and wisdom to be the most important force on the Earth and in the Universe.
3. They think that everybody and everything on the Earth and in the Universe are related and connected.

Occultism or Occult Studies investigate the influences of everybody and everything in the Universe on the human beings on the Earth. Occult Studies often investigate hidden influences. First of all, these are the influences on the people's souls and monads. Occult Studies investigates the possible ways of these influences improving.

Occult Studies consist of different subjects, such as Occult Linguistics, Numerology, Occult Education, etc. Occult Linguistics of English usually investigates the influence of English words, sentences, etc. on the people, even on those who don't understand English. Numerology deals with the influence of numbers, figures, etc. Occult Education investigates the influence of the teacher on the student and vice versa, possible ways of making the processes of teaching and studying pleasant and useful both for the student and for the teacher.

Occult Linguistics of English

Dictionaries of English give the following definitions:

'Manger – a long open container used for feeding cattle.'

'Dog in the manger – a person who stops others using a thing for which he or she has no use (from the fable of the dog who prevented an ox from eating hay which he did not want himself).'

'Dogma – belief or set of beliefs, that people are often expected to accept without questioning, for example: dogma of religion or political party.'

Perhaps, the word 'dogma' doesn't have the origin from the phrase 'dog in the manger'. But the word 'dogma' has the hidden meaning described in this phrase.

We shouldn't believe in the dogmas of any religions, philosophies or psychologies. We should believe in God. We shouldn't trust the dogmas of any parties. The synthesis of will, love and wisdom is the most important force on the Earth and in the Universe.

One more interesting example. The word 'tak' doesn't exist in English. But this word often has positive influence on the people whose native language is English. The reason is that word 'tak' means 'thank you' in Danish and other Scandinavian languages. And it means 'yes' in Ukrainian and other Slavic languages.

Occult Education

As it was mentioned in the 'Introduction', Occult Education investigates the influence of the teacher on the student and vice versa, possible ways of making the processes of teaching and studying pleasant and useful both for the student and for the teacher.

If the teacher doesn't like the subject or students, or if the students don't like the subject or the teacher, the teacher has to change himself, herself or the subject, or leave the job.

According to Esoteric Education, the main task of the teacher is to inspire students. If the teacher inspires students, in some time he or she will feel that students inspire him or her too. Only the teacher and students should decide in what way they will conduct classes.

Occult Qualities of Money

Dictionaries of English give the synonyms to the word 'Occult'. 'Occult - not revealed, secret, hidden.' According to my researches and it is easy to prove that money has the hidden properties:

1. Money of one person or some people is not the occult property of that person or those people. If that person or those people don't share money with the people who need it, money could be lost.
2. If one of the people demands money from another person, it's possible that in some time the third person will demand money from the first, or the first person could lose money, wealth or even health.
3. Every person should have a lot of money.

Occult Relativity

Albert Einstein wrote that no any speed could be more than the speed of the light. Pupils study it at secondary schools in some countries.

Albert. You are not right. You proved this theory on the base of axioms and theories, which are not proved to be true. I'll explain later why it is wrong.

We shouldn't believe in the dogmas of sciences. According to Esoteric Studies (A. Bailey books), human beings live at least on 6 Planes of the Human Beings' World and in the God's World:

1. God's World
2. Monadic Plane
3. Spiritual Plane
4. Intuitive Plane
5. Mental Plane
6. Emotional Plane
7. Physical Plane

These Planes are connected and form hierarchy with the God's World as the most important.

According to my researches:

1. The distance from the Earth to the Sun could be covered in some seconds on the Spiritual Level.
2. Telepathic Language, existing on the Intuitive Level, could cover distances between Celestial Bodies in some seconds or minutes on the Intuitive Level.
3. It is possible to prove:
 1. Speed of the light, the light in A. Einstein's researches, is not the fastest.
 2. Human beings could travel to other Celestial Bodies and cover distances in some minutes or hours.
 3. Human beings could live consciously hundreds, thousands or more years in the physical bodies on the Earth or in the God's World.

Constitution of Human Being

According to Esoteric Studies (A. Bailey 'Initiation, Human and Solar', 'The Constitution of Man'), the constitution of a human being is basically threefold.

1. Monad:
God's World - will, power or the Father
Monadic Plane - love-wisdom or the Son

Articles

© Theosophical Association Aarhus • www.teosofi.org

Spiritual Plane - active intelligence or the Holy Spirit

2.Soul:

Spiritual Plane - spiritual will or atma

Intuitive Plane - intuition or buddhi

Mental Plane - higher or abstract mind or higher manas

3.Personality:

Mental Plane - a mental body or lower manas

Emotional Plane - emotional or astral body

Physical Plane - etherical or vital and dense physical bodies

The Antahkarana is the bridge uniting the human being's personality, soul and monad. Every human being can construct the Antahkarana.

Main Energetic Centers

According to Esoteric Studies (A. Bailey 'Esoteric Healing' p.142), there are 7 main energetic centers in the etherical or vital body of the human being:

1. Head
2. Ajna
3. Throat
4. Heart
5. Solar Plexus
6. Sacral
7. Base of Spine

These centers are connected among themselves. Also they are connected with the human being's soul and monad. The Throat Center is connected with Humanity's main energy, the energy of the active intelligence. The Heart Center is connected with Hierarchy's energy of love, wisdom. The Head Center is connected with Shamballa's energy of will, power and the way towards God. The Ajna Center is the center of synthesis.

Occult Probability

Occult Studies are hidden studies. They begin revealing when human beings stop believing in any dogmas and begin living according to the synthesis of the ideas mentioned in the 'Introduction'.

Occult Probability is the extent to which an event is likely to occur when all the cases including ones that used to be hidden are taken into consideration.

One example. According to Occult Probability and my researches, every adult could become

younger with age. It might be achieved, when a human being:

- Will stop believing in the dogma, that every adult becomes older with age and in other dogmas.
- Will construct the Antahkarana.
- Does the process of Occult Programming.

These are necessary conditions. It is not known yet what are sufficient conditions.

Revelation of New Age Mysteries

Mysteries began revelation in the New Millenium. The first mystery is the mystery of the Antahkarana construction. Although H. Blavatsky and A. Bailey write about it, they don't mention about the key to this mystery.

It is possible to guess about the mystery reading their books. At the same time it is possible to guess about it without knowledge of their books. In this case the synthesis of Buddha and Christ teachings, absence of dogmatism and flexibility in thinking should be carried out. Although it is possible to begin the process of the Antahkarana construction even haven't heard about H. Blavatsky and A. Bailey, their books are extremely important in order to finish the Antahkarana construction.

Construction of Antahkarana

The pessimists think that it is not possible to construct the Antahkarana. The optimists are sure that it became possible with the beginning of the New Millennium, which is called as the period of the New, Golden or Aquarian Age in Theosophy, a lot of religions and philosophies of the world, in Secret and Esoteric Studies, etc.

Human beings usually live consciously on the Physical, Emotional, Mental and Intuitive Planes. In order to construct the Antahkarana, the human being should reach the God's World. The God's World could be reached consciously when a human being studies the sciences of Breath, Inner Massage, Thought, and practice them. He or she should study the sciences of Human Being's Constitution, Metamathematics and Metalinguistics (A.Bailey mentioned about them as the studies of Higher Mathematics and Telepathy in 'Letters on Occult Meditation' p.329), Transmutation and Construction of the Antahkarana. Also the human being should know about Hierarchy, Shamballa, Central Spiritual Sun and God.

The human being should know about the dangers to be avoided in meditation (A.Bailey 'Letters on Occult Meditation', Letter 5). At the beginning of the Antahkarana construction the advice of those people who have constructed the Antahkarana is strongly recommended.

He or she should practice to relax all parts of body except head and heart, create the emotions of joy and love to everybody and everything, exclude all thoughts except the thoughts of reaching the

God's World and helping other human beings. The disciple should visualize a mathematical point of synthesis of light, love and power high in the sky, project the way of the soul to the point and imagine that God is at another side of the point. The disciple should have the synthesis of desires:

1. Reach the God's World
2. Remain alive on the Earth
3. Help other human beings in the construction of the Antahkarana

If everything is done correctly, one day the disciple will feel the magnetic attract to the point. Suddenly the disciple will feel the soul that will begin flying to the point. It's the first stage of the consciousness expansion. The flying may last for several hours. Different questions will be asked. The intuition will help to answer them. But, in any case, the disciple shouldn't believe in any dogmatic statements. The conversation will be carried in Telepathic Language.

Here is the example of the elementary question: 'What is the sum of $1+1$?' The possible correct answer is 'On the Earth $1+1=2$, but in other Worlds $1+1$ might not be 2. That's why I don't believe in the statement that $1+1=2$. I believe only in God and consider the synthesis of will, love and wisdom to be the most important force in the Universe.

In some time the disciple will feel his or her soul to be going through the point or the monad and through Shamballa. It's the second stage of the consciousness expansion. He or she will see the Earth in beautiful colors never seen before. The disciple will have wonderful feelings never had before. The disciple will be healed and taught in the God's World.

Then he or she will have higher initiations. They are not formal ceremonies. They are hard work connected with the third stage of the consciousness expansion and serving people on the Earth. A thin and tenuous Antahkarana will be built. Some months or years will be necessary to make the Antahkarana finished, stable and strong.

Metalinguistics

Metalinguistics deals with Telepathic Language and peculiarities of translation from any language into Telepathic and vice versa. Telepathic Language exists on the Intuitive Level. The human being becomes aware of Telepathic Language at the time of his or her Throat Center awakening. The language isn't spread enough on the Earth because only some people have the awakened Throat Centers and there are many illusions on the Mental Plane.

It is necessary to be attentive translating words or sentences from English or another language into Telepathic. Depending on the tone of the voice, the same sentence 'I love you' could be translated into 3 variants:

'I love you'

'I neither love you, nor hate you'

‘I hate you’

Some cheer. According to Occult Probability, the first variant occurs in the majority of cases.

As far as there are no any obstacles in the God’s World, Telepathic Language covers great distances in short periods of time.

Metamathematics

Why is the mathematical point the only object concentrating on which may lead to the Antahkarana construction? If the disciple, for example, concentrates on the Hierarchy, Buddha or Christ, it doesn’t lead to it. On one hand, they are transcendent and everyone could depict each of them according to the imagination. On another hand, the subject of the imagination consists of unlimited number of visible points, lines or other mathematical figures. Thus, the mathematical point is the smallest visible unit for the concentration.

H. Blavatsky in the Secret Doctrine (Volume 1, Part 3, Chapter 14: Gods, Monads and Atoms) writes about such sciences as Metamathematics and Metageometry. She tells that an uninitiated mind could hardly imagine about their existence.

Materialistic mathematics is based on the point that couldn’t be divided. The mathematical point isn’t the smallest unit. In the process of the Antahkarana construction, when a human being’s soul goes through the mathematical point, he or she understands this fact.

As far as there is analogy between the point and number 1 in mathematics it becomes understandable that A. Einstein’s theories and formulas are true only within narrow frames of materialistic worlds. Really, $1+1$ might not be 2. But A. Einstein’s theories are based on Mathematics, not on Metamathematics.

Now it became understandable why in the process of the Antahkarana construction the question ‘What is the sum $1+1$?’ could be asked. The mathematical point couldn’t allow the soul with the mind that contains any dogmas go through it. Certainly, if $1+1$ is dogmatically 2, the point becomes materialistically not divisible.

Also the point is mentioned in the A. Bailey’s Great Invocation ‘From the point of Light within the Mind of God’. It’s a metamathematical point.

Shamballa

When a human being’s soul goes through the mathematical point and through Shamballa, he or she understands that Shamballa borders the Human Beings’ World and the God’s World. Shamballa do promote the Human Beings’ Evolution.

Occult Programming

Occultists think that everybody and everything on the Earth and in the Universe are related and connected. It means that every human being influences other human beings on the Earth. The human being can have positive or negative influence on others. When the influence is annoying and unpleasant on the Intuitive Plane, this influence is usually negative. When the influence is not annoying and pleasant, this influence is usually positive.

The human beings who have constructed the Antahkarana influence others more because:

1. As far as they don't believe in any dogmatic statements, they are more flexible in their abilities to make decisions;
2. They feel and enjoy life not only on the Physical, Emotional, Mental and Intuitive Planes, but also on the Spiritual, Monadic Planes and in the God's World;
3. They accumulate positive energy from the God's World and spend a lot of it in the Human Beings' World.

Occult Programming investigates the possible ways of positive energy accumulation and spending. The energy is mainly accumulated from Shamballa, Hierarchy and Central Spiritual Sun. A lot of the energy is spent for the consciousness expansion of those human beings who desire to construct the Antahkarana. The main aim of Occult Programming is Evolution.

Group Antahkarana

When human beings meditate using the Great Invocations especially the one 'From the point of Light within the mind of God' they help more and more people to begin the process of the Antahkarana construction. Really, when people meditate they promote the energies of light, love and power going through the point or Group Monad to the Human Being's World. These energies allow the people souls going into opposite direction through the point or monad to the God's World. Although Christ nature is hidden in everybody of human beings, Christ and other Avatars will reappear when the Group Antahkarana consisting of millions Individual Antahkaranas is constructed.

Love

During the process of the Antahkarana construction, the human beings understand that it is not possible at the same time to love one person and hate another, because the words 'love' and 'hatred' are antonyms, which represent opposite energies, positive and negative.

It is not possible at the same time to love one person and not to love other people. But only one person can be who a human being loves most of all. Genuine Love between two people is love existing unanimously at least on 6 Planes of the Human Beings' World and in the God's World. Some people

Articles

© Theosophical Association Aarhus • www.teosofi.org

think that there is only one person in the world with who they will be in Genuine Love. It's not right. Nearly every person meets some people with who he or she could be in Genuine Love.

Hierarchy

The God's World consists of the unlimited number of Planes. The Hierarchy who live in the God's World evolve themselves. As far as everybody and everything in the Universe are related and connected, the Hierarchy's Evolution promotes the Human Beings' Evolution. On another hand, the Hierarchy desire to promote the Human Beings' Evolution and do promote the Evolution.

God

We couldn't reach God, because God is transcendent. God will never be reached.

The main sense of life is in logical, conscious and wonderful approach towards God and in promotion to human beings in their approach towards God. We should love everybody and everything on the Earth and in the Universe. We should love God most of all.
